^A Oregon Average includes 45 Oregon cities surveyed between 1992 and present (figures were not available from all agencies in all categories).

^B SD 19 facilities are not necessarily open to the general public, and the quality of the inventory was not evaluated.

^C No numerical standard is proposed. Continue practice of developing in neighborhood parks.

^D No numerical standard is proposed. Consider acquiring additional riverfront land for boating/fishing access as opportunities arise.

^E No numerical standard is proposed, but high demand; consider development at future community parks and existing pools.

^F No numerical standard is proposed. Continue practice of developing one at each neighborhood and community park, and other park sites, where appropriate.

^G Of the 45 soccer fields in the inventory, 14 are not being used for league play (4-WPRD, 10-SD19). The numbers shown in the "Current/Projected Need" columns reflect the assumption that these fields could be used to meet demand.

^H Of the 27 youth softball fields in the inventory, 3 are not being used for league play (all WPRD). The numbers shown in the "Current/Projected Need" columns reflect the assumption that these fields could be used to meet demand.

^I No numerical standard is proposed. Develop in natural area parks and other park types where appropriate.

^J No numerical standard is proposed. Further evaluate policy for providing teen centers.

^K No numerical standard is proposed. Examine opportunities for providing additional senior services.

^L Of the 25 indoor basketball courts in the inventory, 7 are not being used for league play (1-WPRD, 6-SD19). The numbers shown in the "Current/Projected Need" columns reflect the assumption that these could be used to meet demand.
