## **ACKNOWLEDGEMENTS**

A project of this nature could not have been realized without the support, commitment and generosity of a multi-disciplinary team of recreation specialists, landscape architects, ecologists, historic preservationists, planners, and agricultural specialists. The project team was led by MIG, Inc. in association with Architectural Resources Group and Robert Z. Melnick. Primary authors and designers for the document include MIG staff Dean Apostol, Christina Frank, Laurie Matthews and Elizabeth McLaughlin. Critical and invaluable project oversight was provided by Sally McIntyre and project support was provided by Katy Wolf. Both Stephen Farneth and Arnie Hollander from Architectural Resources Group and Robert Z. Melnick provided valuable insight to the project regarding the site's significant cultural resources.

The project team was generously guided, supported and assisted by the Willamalane Project Steering Committee led by project manager Pat French and interim project manager Greg Hyde. Pat and Greg were joined by colleagues on the committee including: Pam Caples, Jason Genck, Rebecca Gershow, District Superintendent Bob Keefer, Joel Miller, Mike Moskovitz, Lori Quick-Mejia, Jake Risley, and Chris Pryor.

As part of the planning process, local experts were invited to participate in a workshop focused on the cultural and natural resources. We wholeheartedly thank those who shared their passion and knowledge with us and with Dorris Ranch.

- Ed Alverson, The Nature Conservancy
- Matt Blakely-Smith, Institute for Applied Ecology
- Bruce Newhouse, Salix Associates
- Jeff Olsen, Oregon State University Extension Service
- Chris Orsinger, Friends of Buford Park and Mt. Pisgah
- Ross Penhallegon, Oregon State University Extension Service
- Barry Sims, Trout Mountain Forestry

The MIG Team would also like to thank the Willamalane Board of Directors and members of the community who participated in the web questionnaire and open house. Their perspective and comments influenced the direction of this plan and its recommendations.
